Hi,

I'm writing today to request the following ridership data for Clemson Area Transit's fixed route system in a schema similar to that of the following, and preferably in .csv or .xls file:

- Route-level ridership for each day in the month of September 2024 for each individual fixed route, including those corresponding to mode of bus, light rail, commuter rail, streetcar, ferry etc. (where applicable)
- EX:

Route No.	Date	Ridership
1	09/01/2024	100
1	09/02/2024	95
...		
2	09/01/2024	80
2	09/02/2024	75
..

Please let me know if I can help answer any specific questions about this request.

Thanks for your time!

Becca
